leads

APE New Style Leads

APE New Style Leads

Pin connections are basically the same as Pileco leads. When they are pinned together they provide a smooth un-interrupted plane for the hammer guides to glide across.

The old APE leads left a gap at the pin connections.

These leads are deeper for larger hammers.

APE European Type Leads

Wick Mandrel
Housing

Wick tube

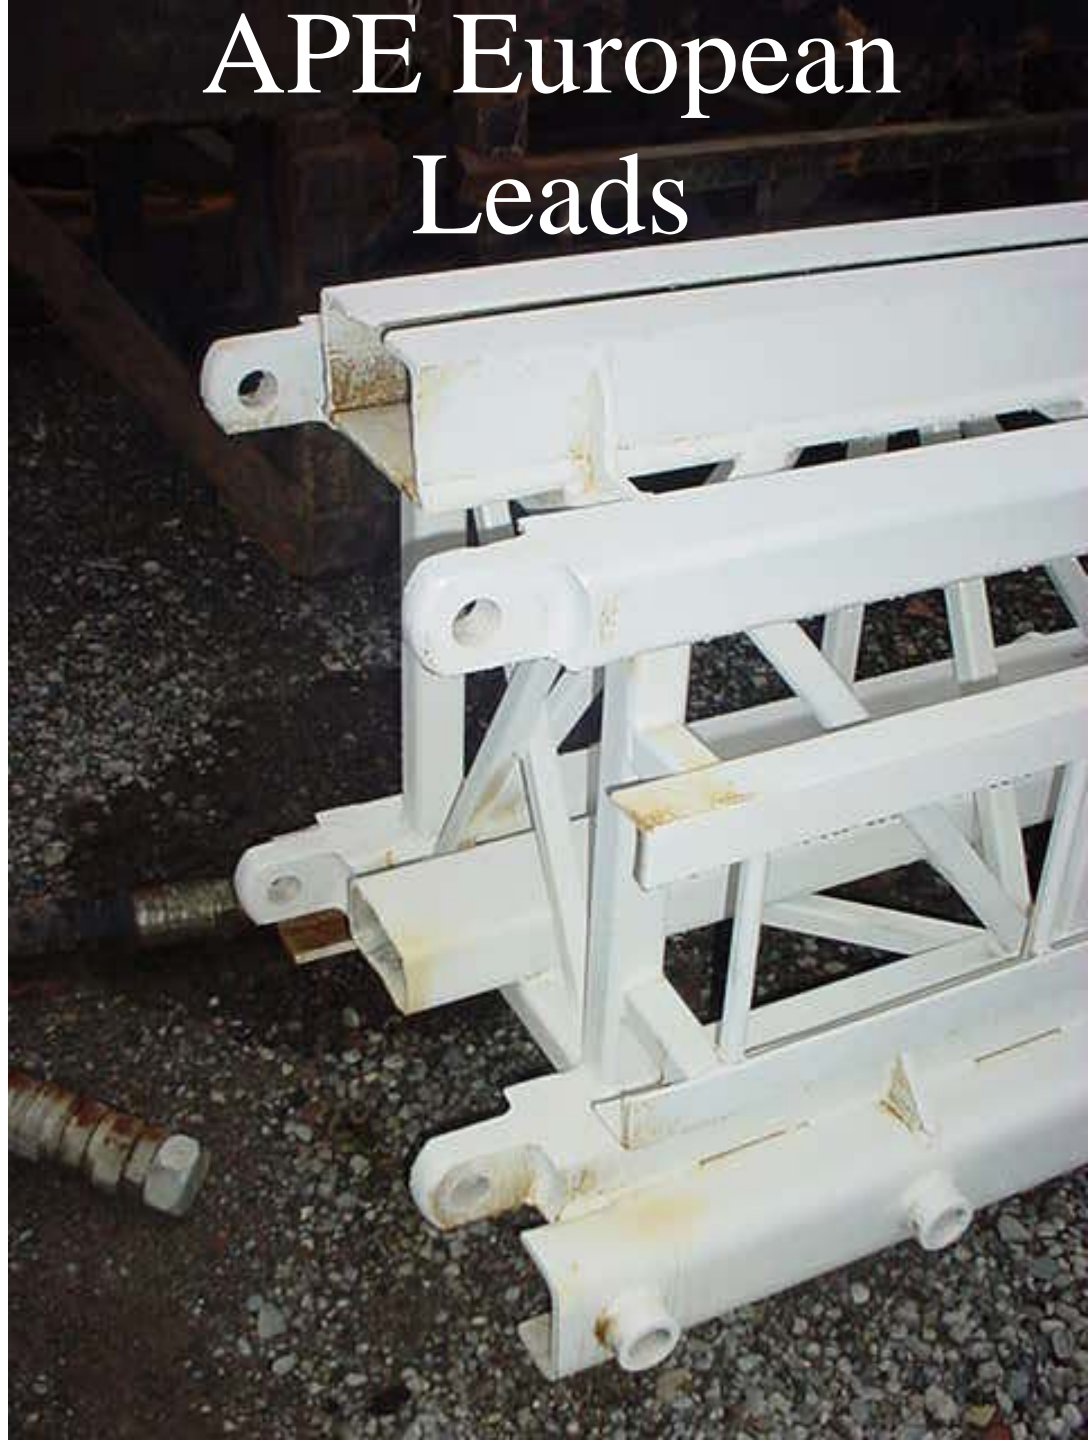

Boom connector track

These APE ST-75 leads are manufactured at the APE facility in Kent, Washington. The above section has optional wick drain tubes and mandrel housing plus boom connector track.
