We have decided to use these for a couple of reasons.

1. They have a watertight rating comparable to IP 67. This means that they have a temporary three foot submersion rating.
2. They will be plug and play. This means if you order the cable as a kit you will just have to plug the ends into the connectors.
3. Two will be L.E.D. lighted at the deutsch end of the cable.
4. The pressure switch cable will not have the L.E.D.

Here are the item numbers for the cables.

- | | | | |
|----|---------|--------------------------------|---|
| 1. | 1002085 | Cord SO-LED-f Deutsch Pin-175" | This is the long cable used on V.M. units |
| 2. | 1002086 | Cord SO-f Deutsch Pin-120" | This is for the pressure switch no L.E.D |
| 3. | 1002084 | Cord SO-LED-f Deutsch Pin-135" | This is the most commonly use length. |
